

# Table of Contents

## MANUFACTURING AND PROCESSING

- Fiber Micro-Buckling Model during Cure Process of CFRP . . . . . 39**  
T. KIUCHI, A. TODOROKI and R. MATSUZAKI
- Evaluation of Temperature Profiles in Thick Composite Parts  
during Autoclave Processing. . . . . 137**  
T. SHIMIZU, J. C. KOTIK, A. R. A. ARAFATH and A. POURSAARTIP
- In-situ Synthesis and Thermal Properties of  $ZrO_2/ZrW_2O_8$   
Composites. . . . . 14**  
L. SUN, H. KONG, X. SHI, A. SNELLER, C. UHER and P. KWON
- Wetout of High Pull Speed Resin Injection Pultrusion for Tapered  
Injection Chamber with Multiple Injection Ports. . . . . 12**  
A. L. JESWANI, J. A. ROUX and J. G. VAUGHAN
- Development and Analysis of a Hybrid Reinforced Composite  
Material for Solid Rocket Motor Insulation . . . . . 13**  
A. F. AHMED and S. V. HOA
- Vacuum Induced Preform Relaxation (VIPR) Process for Resin Flow  
Control in Vacuum Infusion Processes. . . . . 182**  
J. B. ALMS, J. L. GLANCEY and S. G. ADVANI

## TEXTILES, FIBERS, AND PREFORMS

- Effect of Processing Parameters on the Strength of Resin Infused  
Polyamide-6 Impregnated Glass Fabric Composite . . . . . 64**  
B. J. GIEFER and P. K. MALLICK
- Manufacture of Layered Fiber/Metal Hybrid Composites by the  
VARTM Process. . . . . 36**  
A. C. LOOS, R. J. CANO, B. J. JENSEN and E. S. WEISER
- Initial Fracture and Crack Progress of Off-Axis Glass Woven  
Composites. . . . . 139**  
A. ODAWARA, T. SUGIE, A. NAKAI and H. HAMADA

<b>Mechanical Properties of Hybrid Braided Composite Tube.....</b>	<b>141</b>
Y. SASAKI, Y. KOBAYASHI, A. OHTANI, A. NAKAI and H. HAMADA	

## **NUMERICAL MODELING**

<b>Assessment of Delamination Propagation Capabilities in Commercial Finite Element Codes.....</b>	<b>11</b>
R. KRUEGER	

<b>Modeling Energy Absorption of Composite Structures with a Coupled Damage-Plasticity Model .....</b>	<b>23</b>
X. XIAO	

<b>Influence of Laminate Thickness Approximation Methods on the Performance of Optimal Filamentary Pressure Vessels .....</b>	<b>29</b>
S. KOUSSIOS	

<b>Modeling of Failure from Processing Induced Defects in Polymer Matrix Composites .....</b>	<b>109</b>
R. TALREJA and C. V. SINGH	

## **MODELING AND ANALYSIS I**

<b>Electro-Thermo-Mechanical Coupling in Composites .....</b>	<b>48</b>
O. I. ZHUPANSKA and R. L. SIERAKOWSKI	

<b>On the Use of the Separated J-integral and the p-version of the Finite Element Method for the Computation of the Energy Release Rate Components for Cracks in Composite Materials .....</b>	<b>170</b>
R. L. ACTIS and S. NERVI	

<b>Effective Longitudinal Anisotropy of a Fiber-Reinforced Composite with Rectangular Symmetry: Elastic Orthotropic Case.....</b>	<b>38</b>
G. G. NAVA-GÓMEZ, H. CAMACHO-MONTES, R. RODRÍGUEZ-RAMOS and F. J. SABINA	

<b>Continuity of the Solutions Obtained by Lekhnitskii's Theory for Anisotropic Plates: Sign Selection Strategies.....</b>	<b>30</b>
S. KOUSSIOS	

## **MODELING AND ANALYSIS II**

<b>A Finite Element Analysis for Predicting the Residual Compressive Strength of Impact-Damaged Sandwich Panels .....</b>	<b>54</b>
J. G. RATCLIFFE and W. C. JACKSON	

<b>Modeling Crashworthiness of Composites using ABAQUS .....</b>	<b>131</b>
K. INDERMUEHLE	

<b>Particle Modeling for Blasting Simulations . . . . .</b>	<b>78</b>
G. WANG, A. AL-OSTAZ, A. H.-D. CHENG and P. R. MANTENA	

**ANALYSIS AND TESTING**

<b>Numerical Study of the Foreign-Object Impact on the Composite Fan Blade . . . . .</b>	<b>135</b>
M. NISHIKAWA, K. HEMMI and N. TAKEDA	

<b>A Multiscale Failure Model for Thin Heterogeneous Plates . . . . .</b>	<b>46</b>
C. OSKAY	

<b>Stress Concentrations around Cut-Outs in Anisotropic Plates: A Short Assessment of Lekhnitskii's Formalism . . . . .</b>	<b>45</b>
M. J. VAN ENKHUIZEN, S. KOUSSIOS and A. BEUKERS	

**TESTING I**

<b>Impact Behavior of Nanoparticulate-Adhesive Bonded Composites . . . . .</b>	<b>60</b>
E. WOLDESENBET, P. MYLAVARAPU and B. DEMISSIE	

<b>Dynamic Crushing of Composite Structures: Experiment and Simulation . . . . .</b>	<b>17</b>
P. FERABOLI, F. DELEO, B. WADE, M. RASSAIAN and M. RUCKI	

<b>Dynamic Crush Response of RTM vs. Roll Wrapped Crash Boxes . . . . .</b>	<b>2</b>
A. L. BROWNE, N. L. JOHNSON and M. E. BOTKIN	

<b>Influence of Geometry on the Stability Characteristics of Bistable Cross-Ply Laminates . . . . .</b>	<b>41</b>
S. A. TAWFIK, D. S. DANCILA, M. TADROS and E. A. ARMANIOS	

<b>Properties of Nanoparticulate Syntactic Foams at High Microballoon Volume Fraction . . . . .</b>	<b>57</b>
S. L. PETER and E. WOLDESENBET	

<b>ASTM Committee D30 on Composite Materials: An Overview and Status Report . . . . .</b>	<b>184</b>
A. J. SAWICKI and C. Q. ROUSSEAU	

**TESTING II**

<b>Development of a Failure Criterion for Cavitation and Debonding Induced Failure under Transverse Loading in Multi-Fiber Composites using the Cruciform Specimen Geometry . . . . .</b>	<b>42</b>
D. C. FOSTER, G. P. TANDON and M. ZOGHI	

<b>Effect of Structure on Electrical Conductance of Single Wall Carbon Nanotubes . . . . .</b>	<b>56</b>
S. AKANDA, Y. ZHOU and S. JEELANI	

<b>Investigations of Nanocomposites Containing Carbon Nanotubes by TEM and a Home Made SEM. ....</b>	<b>138</b>
F. DENG, T. OGASAWARA and N. TAKEDA	
<b>Vibration Testing of a Carbon Composite Fuselage .....</b>	<b>99</b>
J. SIMSIRIWONG and R. W. SULLIVAN	
<b>Investigation of the Pumping Action of a Barrel-Shaped Shell-of-Revolution Composite Structure .....</b>	<b>1</b>
H. GHONEIM and T. SANTOS	

## **TESTING AND SMART STRUCTURES**

<b>Characterization of Quasi-Static and Dynamic Response of Functionally Graded Composites. ....</b>	<b>19</b>
D. V. AN, N. GUPTA and R. CAETI	
<b>Strength of Composite Angle Bracket with Nano-Enhanced Resins ....</b>	<b>110</b>
S. C. AVALON and S. L. DONALDSON	
<b>Damage Identification in Laminated Composites using Spectral Data .....</b>	<b>147</b>
V. RANATUNGA and K. V. SINGH	
<b>Damage Identification of Quasi-Isotropic Graphite/Epoxy Laminates using Electrical Resistance Change .....</b>	<b>44</b>
Y. SAMEJIMA, Y. HIRANO, A. TODOROKI and R. MATSUZAKI	
<b>Encapsulation of Micro-Optical Sensors for Applications of Stress Measurement .....</b>	<b>32</b>
N. Q. NGUYEN and N. GUPTA	
<b>Novel Method of Self-Healing of Composites .....</b>	<b>150</b>
N. FIKRU and E. WOLDESENBET	

## **DAMAGE AND FAILURE**

<b>FEM Modeling on Interfacial Debonding of Single Short Fiber Composite with Elasto-Plastic Matrix .....</b>	<b>43</b>
Y. PAN and A. A. PELEGRI	
<b>Carbon Nanotube Networks as a Strain Indicator and Failure Predictor in Polymer Matrix Composites Subjecting to Static and Dynamic Loads. ....</b>	<b>153</b>
M. NOFAR, S. V. HOA and M. D. PUGH	
<b>Comparison of Creep Response and Damage Accumulation between Chopped and Continuous Glass Fiber Mat Thermoplastic Composites .....</b>	<b>49</b>
P. DASAPPA, J. MUI, P. LEE-SULLIVAN, X. XIAO and P. H. FOSS	

<b>Mode II Fracture—Simulations and Experiments</b> . . . . .	<b>70</b>
A. A. BROWN, W.-Y. LU, J. FOULK, III, S. MARGOLIS, T. BENNETT and Y. OHASHI	

**LAMINATE MECHANICS**

<b>Behavior of Quasi-Three-Dimensional Woven Composites</b> . . . . .	<b>6</b>
D. LIU, K. ROSARIO and S. KLANN	

<b>Transverse Load Introduction in Thick Composites.</b> . . . . .	<b>24</b>
W. WILSON, R. CREEMERS, P. NIJHUIS, M. SMEETS and P. VERGOUWEN	

<b>Analysis of Laminated Composites Tapered Tubes.</b> . . . . .	<b>154</b>
C. RAO and W. S. CHAN	

<b>A Correlation Model for Graphite/Epoxy Properties for Propagating Uncertainty to Strain Response</b> . . . . .	<b>65</b>
B. P. SMARSLOK, R. T. HAFTKA and P. IFJU	

<b>Experimental Verification of Hygrothermally Stable Laminates with Optimal Extension-Twist Coupling</b> . . . . .	<b>72</b>
R. HAYNES, R. CROSS and E. ARMANIOS	

**DESIGN**

<b>Design and Manufacture of a Composite Cylinder with Circumferentially Varying Stiffness</b> . . . . .	<b>73</b>
A. W. BLOM, J. LIST, P. B. STICKLER and Z. GÜRDAL	

<b>Optimal Shapes and Winding Parameters for Filament Wound Articulated Pressure Vessels</b> . . . . .	<b>21</b>
L. ZU, S. KOUSSIOS and A. BEUKERS	

<b>Pattern Design and Optimization for Filament Wound Toroidal Pressure Vessels</b> . . . . .	<b>22</b>
L. ZU, S. KOUSSIOS and A. BEUKERS	

<b>Design and Analysis of Tow-Steered Composite Shells using Fiber Placement.</b> . . . . .	<b>125</b>
K. C. WU	

<b>Dimension and Stacking Sequence Optimization of Rocket Interstage Composite Structure</b> . . . . .	<b>10</b>
A. TODOROKI and M. SEKISHIRO	

<b>Design of Carbon Fiber Hybrid—PAN/Pitch-Flat Braided Fabric Composites.</b> . . . . .	<b>143</b>
Y. KOBAYASHI, Y. SASAKI, A. OHTANI, S. OKAJIMA, M. S. ALY-HASSAN, A. NAKAI, H. HAMADA and H. HATTA	

## **DURABILITY AND DAMAGE TOLERANCE**

**A Theoretical Model for Prediction of Damage Evolution and Degradation in Composites Due to Environmental Ageing . . . . . 172**  
R. RAHMAN and A. HAQUE

**Interaction of Oxidation, Stress and Damage in High Temperature Polymeric Matrix Composites . . . . . 88**  
K. POCHIRAJU, G. P. TANDON and G. SCHOEPPNER

**Assessment of Composite Delamination Self-Healing via Micro-Encapsulation . . . . . 181**  
T. K. O'BRIEN and S. R. WHITE

**A Stochastic Fatigue Damage Model for Composite Single Lap Shear Joints Based on Markov Chains and Thermoelastic Stress Analysis . . . . . 173**  
S. JOHNSON, B.-S. WEI and R. HAJ-ALI

## **FATIGUE, FRACTURE AND RESIDUAL STRENGTH**

**Dynamic Mode-II Crack Propagation in Z-Pinned Composites . . . . . 123**  
H. HUANG and A. M. WAAS

**High Resolution Tomographic Imaging and Modeling of Notch Tip Damage in a Laminated Composite . . . . . 9**  
P. WRIGHT, A. J. MOFFAT, I. SINCLAIR and S. M. SPEARING

**Quick Repairs of Composite Structures. . . . . 86**  
H. S. ROH, C. T. SUN and R. B. PIPES

**Damage Resistance and Tolerance of Carbon/Epoxy Composites under Lightning Strike Loading . . . . . 16**  
P. FERABOLI and M. MILLER

**Characterization of the Effects of Lay-up, Stress Level, and Stress Ratio on Fatigue Damage Development in Graphite Epoxies using Radiography . . . . . 105**  
J. D. RAST and W. S. JOHNSON

**Reliability-Based Evaluation of Composite Structure Damage Tolerance Related to Failure Mechanisms . . . . . 136**  
A. V. STYUART, C. H. E. CHEUNG, E. LIVNE and K. Y. LIN

## **NATURAL FIBERS AND RESINS**

**Fabrication and Mechanical Properties of Braided Continuous Natural Fiber Reinforced Biodegradable Composite . . . . . 142**  
N. SHIKAMOTO, W. PATCHARAT, A. OHTANI, Y. W. LEONG and A. NAKAI

**Lamination Process for Chemical Retted Kenaf Fiber/Thermoplastic  
Polymer Composites . . . . . 62**  
S. Q. SHI, S. LEE and J. SHI

**Deformation Behavior of Bamboo Bow with Hybrid Structure. . . . . 140**  
K. SHIBATA, Y. HIDEKUMA, A. NAKAI and H. HAMADA

**Synthesis and Characterization of Modified Soybean Oil and  
Methacrylated Fatty Acid Derived Resins for Sheet  
Molding Compounds. . . . . 121**  
T. NELSON, M. V. HOSUR, J. LASCALA and S. JEELANI

## **MODELING OF NANOCOMPOSITES**

**Nanotechnology Training for Engineers: Tearing Down Traditional  
Walls. . . . . 27**  
V. DANG, R. MAGUIRE, M. RICHEY and W.-H. K. ZHONG

**Electrical Conductivity and Damage Sensing of Carbon  
Nanotube-Based Composites . . . . . 98**  
C. LI and T.-W. CHOU

**Molecular Dynamics Simulation of Adhesion at Epoxy Interfaces . . . . . 33**  
S. J. V. FRANKLAND, T. C. CLANCY, J. A. HINKLEY and T. S. GATES

## **NANOCOMPOSITES FABRICATION**

**Influence of Dimethylacetamide on the Dispersion and Mechanical  
Properties of a Thermotropic Liquid Crystalline Polymer Mixed  
with Vapor-Grown Carbon Nanofibers or Single-Walled  
Carbon Nanotubes. . . . . 53**  
A. ROHATGI, J. P. THOMAS and R. K. EVERETT

**Fabrication and Characterization of Magnetic Nanoparticles  
Reinforced Polyacrylonitrile Nanocomposites. . . . . 93**  
Z. GUO, R. CHUNG, B. CHEN, T. PEREIRA, H. T. HAHN,  
T. YAMAZAKI, A. B. KARKI and D. P. YOUNG

**Preparation and Characterization of Layered Silicate Nanocomposites  
Based on Resole Phenolic Resins and Brominated Resole Phenolic  
Copolymer Resins . . . . . 95**  
M. E. MOORE, M. V. HOSUR, A. G. LUDWICK and S. JEELANI

**Multi-Functional Reactive Graphitic Nanofibers (r-GNFs)-Epoxy  
Resin as Matrix for Composites . . . . . 66**  
S. JANA and W.-H. ZHONG

**Nanostructure/Strain-Resistance in Nanolaminates Containing Carbon  
Nanofibers and Carbon Nanotubes . . . . . 85**  
M. MERRILL and C. T. SUN

## **CHARACTERIZATION OF NANOCOMPOSITES**

- Characterization of Functionally Gradient Syntactic Foam . . . . . 59**  
K. CHITTINENI and E. WOLDESENBET
- Low Velocity Impact Behavior of Nanoparticulate Syntactic Foam  
Sandwich Structured Composites. . . . . 61**  
N. SANKELLA, P. MYLAVARAPU and E. WOLDESENBET
- Review of Bond and Tensile Durability of a GFRP Reinforcement  
Bar in Concrete . . . . . 91**  
C. E. BAKIS

## **TESTING OF NANOCOMPOSITES I**

- The Effect of Nano Particles into Sandwich Composites Energy  
Absorption and Failure Mechanism. . . . . 84**  
A. F. ÁVILA, D. T. L. DA CRUZ, E. C. DIAS, M. C. ANDRADE  
and D. G. DE SOUSA
- Experimental Study on Thermal and Mechanical Properties of Clay  
Modified Carbon Fiber Reinforced Epoxy . . . . . 151**  
Y. ZHOU, M. S. SHAIK, S. JEELANI, T. E. LACY  
and M. F. HORSTEMEYER
- Thermomechanical Response and Interphase of a Novel Carbon  
Nanotube Array-Reinforced Laminated Composite Material . . . . . 5**  
J. L. ABOT and Y. SONG
- Analytical Model for Mode I Interlaminar Toughness of Composites  
Reinforced with Aligned Carbon Nanotubes. . . . . 101**  
J. BLANCO, E. J. GARCÍA, R. G. DE VILLORIA and B. L. WARDLE

## **TESTING OF NANOCOMPOSITES II**

- An Investigation on Nanocomposites Damage Tolerance . . . . . 82**  
A. F. ÁVILA, M. ALVES and R. C. SANTIAGO
- Moisture Absorption and Mechanical Properties Characterization of  
Polyurethane Foams with and without Nanoclay . . . . . 74**  
S. MOHAN, A. BALAKRISHNAN and M. C. SAHA
- Effect of Strain Rates on Energy Absorption of Exfoliated  
Graphite Platelet and Cloisite Nanoclay Reinforced  
Vinyl Ester Nanocomposites . . . . . 152**  
S. GUPTA, P. R. MANTENA and A. AL-OSTAZ
- An Investigation on Nanocomposites under Intense Heat Conditions. . . . 81**  
A. F. ÁVILA, J. H. KOO and A. Q. BRACARENSE

**Effects of Carbon Nanotube Reinforcement on Mechanical Response and Damage Tolerance of Carbon/Epoxy Composites . . . . . 89**  
J.-M. CHO, I. M. DANIEL and D. A. DIKIN

**Characterization of Neat and Nanophased Epoxy Polymers Subjected to Accelerated Aging Conditions . . . . . 108**  
S. ZAINUDDIN, M. V. HOSUR, Y. ZHOU, A. KUMAR and S. JEELANI

## **CONSTRUCTION COMPOSITES**

**Environmental Effects on Pull-Out Properties of Carbon Fiber Tow in Epoxy Resin . . . . . 175**  
S. VEMUGANTI, A. HAQUE, S. ROY, P. K. DUTTA, J. TROVILLION and A. KUMAR

**Effect of Environmental Degradation on Interlaminar Shear and Flexure Strength of Carbon/Epoxy Composites . . . . . 106**  
S. ROY, S. GORUGANTHU, S. A. CHAWLA, A. NAIR, A. HAQUE, P. K. DUTTA, J. TROVILLION and A. KUMAR

**Durability Study of Neat/Nanophased GFRP Composites under Different Environmental Conditioning . . . . . 177**  
S. ZAINUDDIN, M. V. HOSUR, Y. ZHOU, A. KUMAR and S. JEELANI

**Evaluation of Thermal Effects on Mechanical Properties of Epoxy, Carbon Fiber and Carbon/Epoxy Composite . . . . . 178**  
B. DEY, Y. ZHOU, M. V. HOSUR, S. JEELANI, A. KUMAR and L. D. STEPHENSON

**Life Estimation of Construction Composites by Means of MMF and ATM . . . . . 180**  
A. MIRAVETE, B. SMITH and J. FANUCCI

**Thermoplastic Composite Structural Insulated Panels (CSIPS) for Modular Construction . . . . . 179**  
U. VAIDYA, A. VAIDYA, S. PILLAY and N. UDDIN

## **INFRASTRUCTURE**

**Transverse FRP Composite Reinforcements for Improving Shear Performance and Ply Engagement of Glued-Laminated Timbers . . . . . 146**  
T. R. GENTRY, J. SCHWARTZ, S. HENSEY and C. CHANG

**Use of Nano-Particle Enhanced Composites to Reduce Blast Vulnerability of Low Rise RC Frame Buildings . . . . . 75**  
C. BURCHFIELD, N. PANGAVE, M. RUSSELL, C. MULLEN and T. TADEPALLI

**Interfacial Behavior of Side Plated CFRP-to-Concrete Joints under Cyclic Shear Loading . . . . . 183**  
L. MAHMOUD, N. SHAFIQ, M. FADHIL and W. THANOON

## IMPLEMENTATIONS

- Development of Multifunctional Structural Composites for Energy Harvesting** ..... 97  
T. PEREIRA, Z. GUO, T. YAMAZAKI and H. T. HAHN
- Mediator-Less Glucose Biosensor Based on Carbon Nanotube Mat** ..... 87  
J. E. RYU, H. KIM, H. T. HAHN and D. LASHMORE
- Effect of Process Modification on the Microstructure and Properties of Fiber Reinforced Metal Matrix Composites** ..... 31  
N. Q. NGUYEN, S. D. PETERSON and N. GUPTA

## JN REDDY SYMPOSIUM

- Adaptive Multiscale Modeling of Progressive Failure in Composite Laminates** ..... 26  
D. H. ROBBINS, JR.
- Micromechanical Modeling of Thermo-Oxidative Degradation of High Temperature Polymer Matrix Composites** ..... 8  
S. ROY and S. SINGH
- Non-Cylindrical Composite Pressure Fuselages** ..... 50  
F. J. J. M. M. GEUSKENS and S. KOUSSIOS
- Healing Behavior of a Carbon/Mendomer Composite** ..... 40  
J. S. PARK, H. S. KIM and H. T. HAHN
- An Elastic-Plastic and Strength Prediction Model for Injection-Molded Long-Fiber Thermoplastics** ..... 79  
B. N. NGUYEN, V. KUNC, J. H. PHELPS, C. L. TUCKER, III  
and S. K. BAPANAPALLI
- Ecofriendly Plastics from Biofiber and Biodegradable Polymers** ..... 47  
S. SAHOO, A. NAKAI, S. K. NAYAK, M. MISRA, A. K. MOHANTY,  
S. S. TRIPATHY and H. HAMADA
- Boundary Singularities in the Off Axis Coupon** ..... 114  
A. RITCHEY and R. B. PIPES
- A Novel, Multiscale High Fidelity Progressive Damage and Failure Modeling Approach for Laminated Fiber Reinforced Composites** ..... 96  
E. J. PINEDA, A. M. WAAS, B. A. BEDNARCYK and C. S. COLLIER
- Characterization of Light Weight Composite Proppants** ..... 100  
M. C. KULKARNI and O. O. OCHOA
- Multi-Functional Composite Fatigue** ..... 104  
L. MINNETYAN and C. C. CHAMIS

<b>Viscoelastic Designer Composite Materials</b> .....	<b>112</b>
H. H. HILTON	
<b>Multiscale Biomechanical Analysis of Uterine Tissue</b> .....	<b>118</b>
